

October 13, 2020

Effective immediately, applications for any building permit, which require a certificate of occupancy or certificate of compliance, as applicable under the provisions of the building code involving outdoor lighting fixtures, must submit as part of the application evidence the proposed work will comply with outdoor lighting standards in accordance with [LDC. Sec. 10-102. - Outdoor single- and two-family residential lighting standards.](#)

All applications relative to the above, must fully complete the following document. Failure to do so will delay the permit issuance process.

- [Residential Building Lighting Standards Verification](#)

For additional information kindly visit the [Residential Lighting Standards Help Page.](#)

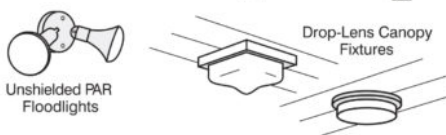

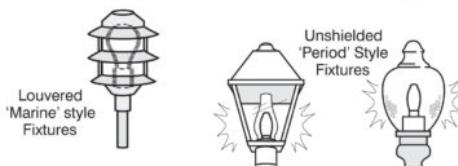

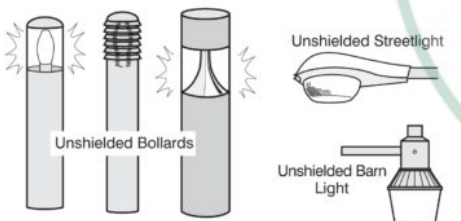

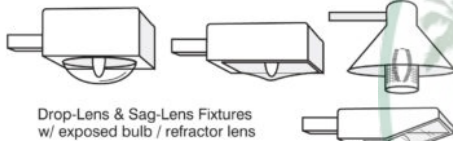

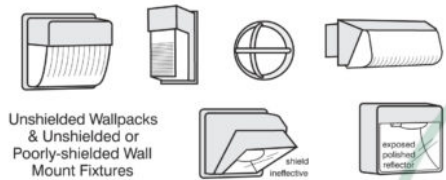

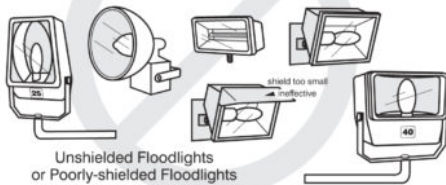

Examples of Acceptable / Unacceptable Lighting Fixtures

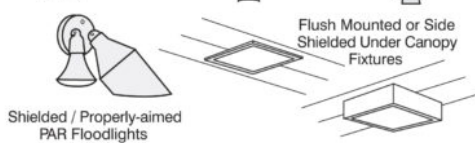

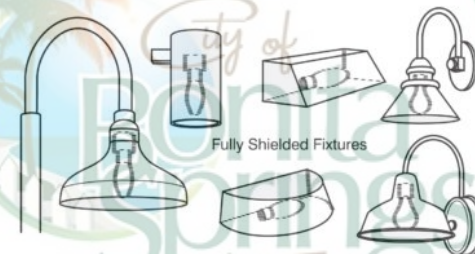

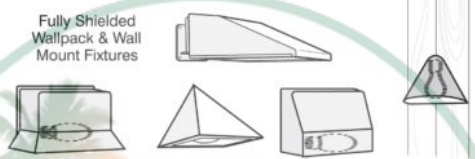

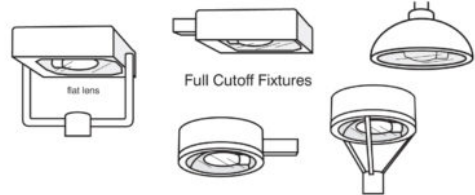

Unacceptable / Discouraged

Fixtures that produce glare and light trespass

Acceptable

Fixtures that shield the light source to minimize glare and light trespass and to facilitate better vision at night
